

LEARNING OPPORTUNITIES ON THE WOMEN'S HEALTH UNIT

The unit is very specialised and different to a ward placement, but offers a greater insight into gynaecology. We hope you make the most of your time on the unit.

- You will be able to attend various clinics, including spending time with the Nurse Practitioner
- You will be able to observe/participate in health education, ranging from contraception advice, sexual health and treatments and advice following surgery.
- Gynaecology emergencies and unit attenders.
- You may have an opportunity to attend a TOP (termination of pregnancy) clinic* and then follow a patient through the first and second visits.
- Care for day-case patients undergoing minor gynaecological procedures

* ***As a student nurse you are within your rights to decline participating in the termination of pregnancy. Please state your feeling to your mentor. You may not wish to actively participate but would still like to acquire knowledge and understanding of this service, for example the various procedures. The choice is yours.***
